On behalf of the Canadian Medical Association (CMA), I am pleased to congratulate all those involved in producing the Canadian edition of Caroline's *Emergency Care in the Streets*. This first-ever Canadian textbook in Emergency Medical Services (EMS) is a notable achievement, and marks the continued evolution of EMS education in Canada.

The CMA has long recognized the important roles of all health professions in the continuum of patient care in Canada. The CMA is proud to play a part in the education of EMS providers by providing corporate leadership for the conjoint accreditation process, in an effort to maintain national standards for paramedic programs throughout Canada. Through the collaboration of emergency physicians, paramedics and paramedic educators, paramedic programs are reviewed regularly against national competency requirements to ensure that these programs continue to prepare safe and effective EMS practitioners.
