The author, editor, and publisher have made every effort to provide accurate information. However, they are not responsible for errors, omissions, or for any outcomes related to the use of the contents of this book and take no responsibility for the use of the products and procedures described. Treatments and side effects described in this book may not be applicable to all people; likewise, some people may require a dose or experience a side effect that is not described herein. Drugs and medical devices are discussed that may have limited availability controlled by the Food and Drug Administration (FDA) for use only in a research study or clinical trial. Research, clinical practice, and government regulations often change the accepted standard in this field. When consideration is being given to use of any drug in the clinical setting, the health care provider or reader is responsible for determining FDA status of the drug, reading the package insert, and reviewing prescribing information for the most up-to-date recommendations on dose, precautions, and contraindications, and determining the appropriate usage for the product. This is especially important in the case of drugs that are new or seldom used.

Preface

This book is intended to be a concise resource, making the current guidelines more accessible for healthcare professionals taking care of patients with asthma. More detailed information can be found in the current U.S. guidelines, the National Asthma Education and Prevention Program Expert Panel Report 3: Guidelines for the Diagnosis and Management of Asthma Full Report 2007 from the National Heart, Lung, and Blood Institute. This information is available at:

<http://www.nhlbi.nih.gov/guidelines/asthma/asthsumm.pdf>.

Acknowledgments

I would like to thank the following individuals for their help and guidance in the development of this book. I couldn't have done it without you! Anthony L. DeWitt, RRT, CRT, JD, FAARC, AANG; Vern Enge, MA; Abigail Gobin, MLS; Joan Kohorst, MA, RRT; Doug McIntyre, MS, RRT, FAARC; William M. Stader, CRT, AE-C; and Susan Steinbis, MSN, NP.

About the Author

Margaret Varnell Clark, MS, RN, RRT-NPS, is an award-winning writer and medical editor. She was the Editorial Director for Pulmonary and Critical Care Medicine at Medscape/WebMD from 2004–2009. Prior to this she was the Clinical Coordinator for Respiratory Care, Boston University/Boston Medical Center in Massachusetts. Clark has been a field correspondent for *ADVANCE for Respiratory Care* news magazines since 1990. She is also known for her work with Reuter’s Health and PBS television. Clark is the 1996 recipient of the Bird Lifetime Achievement Award given by the American Association of Respiratory Care for her extensive writing on pulmonary medicine. She has served on several boards and committees for the American College of Chest Physicians and has worked and lectured extensively in the United Kingdom, Europe, and Central America.
