Acknowledgments

The editors are grateful to all of the contributors for their thoughtful, comprehensive chapters. We would also like to thank those who helped us find information or directed us to appropriate sources, such as Kathleen Grove, who brought several college programs on preventing dating violence to our attention, and the patients who shared with us the reality of living in a violent relationship. We would like to acknowledge the team at Jones & Bartlett Learning. Finally, we both want to thank our families for their patience and support through the time-consuming but highly rewarding process of creating this book.
