Figure and Table Credits Page	283

We acknowledge the assistance of our graduate students, Erlan Bakiev, Fatih Demiröz, Vener Garayev, Sana Khosa, and Samuel Turner in undertaking research for this book. Their diligent work played a critical role in its preparation, and they carried out their role with a high level of enthusiasm and academic excellence. We acknowledge Professor Richard T. Sylves's contribution of reviewing questions in the book. We'd also like to thank the six reviewers whose comments have strengthened the manuscript. Finally, we would like to express our gratitude to the team at Jones & Bartlett Learning: Catie Heverling, Chloe Falivene, Teresa Reilly, and Rebekah Linga, for their excellent support throughout this project.

Professor  
Online Learning  
DeVry University

John P. Tiefenbacher, PhD  
Professor, Director  
Department of Geography  
Texas State University

This book is structured and written in such a way that each chapter can be read separately, which we think is essential to respond to the needs of busy professionals and academics. Reading all chapters consecutively is our recommendation, but if you prefer to go directly to the topics and issues that are most relevant to you, such a targeted study will still provide a picture of the wider emergency management issues covered in other chapters. This broader scope is essential to provide a level of general contextualization in each chapter. Although focusing on only certain areas of the book offers a faster and more effective way of reaching the information you find most relevant to your circumstances, this strategy has the inevitable consequence of repetition of some key issues, processes, and phases between chapters.
