Theoretical Foundations of Health Education and Health Promotion

Second Edition
Theoretical Foundations of Health Education and Health Promotion

Second Edition

Manoj Sharma, MBBS, CHES, PhD
Professor, Health Promotion & Education
Professor, Public Health
University of Cincinnati

John A. Romas, MPH, PhD, LPC
Professor Emeritus, Department of Health Science
Minnesota State University
## CONTENTS

Preface xi  
Acknowledgments xiii  

### CHAPTER 1  Introduction to Health Education, Health Promotion, and Theory  2  

**Key Concepts**  
- Health, Behavior, and Health Behavior 2  
- Health Education and Health Promotion 6  
- Responsibilities and Competencies for Health Educators 9  
- Code of Ethics for the Health Education Profession 14  
- Health Education Organizations 15  

**Basic Vocabulary in Health Education and Health Promotion** 21  

**Role of Theory in Health Education and Health Promotion** 27  

**Application Exercise** 30  

**Skill-Building Activity** 30  

**Summary** 31  

**Important Terms** 31  

**Review Questions** 32  

**Websites to Explore** 32  

**References and Further Reading** 34  

### CHAPTER 2  Planning Models in Health Education and Health Promotion  40  

**Key Concepts** 40  

**Differences Between a Model and a Theory** 41  

**PRECEDE-PROCEED Model** 43  

**Planned Approach to Community Health Model** 48  

**The Multilevel Approach to Community Health Model** 51  

**Intervention Mapping** 52

**CHAPTER 3** The Health Belief Model 74

| Key Concepts | 74 |
| Historical Perspective | 75 |
| Constructs of the Health Belief Model | 76 |
| Applications of the Health Belief Model | 81 |
| Limitations of the Health Belief Model | 84 |
| Application Exercise | 85 |
| Skill-Building Activity | 86 |
| Summary | 87 |
| Important Terms | 89 |
| Review Questions | 89 |
| Websites to Explore | 89 |
| References | 90 |

**CHAPTER 4** The Transtheoretical Model 96

| Key Concepts | 96 |
| Historical Perspective | 97 |
| Constructs of the Transtheoretical Model | 98 |
| Phases of Interventions Based on the Transtheoretical Model | 104 |
| Applications of the Transtheoretical Model | 104 |
| Limitations of the Transtheoretical Model | 107 |
| Application Exercise | 108 |
CHAPTER 5  Theory of Reasoned Action and Theory of Planned Behavior 122

Key Concepts 122
Historical Perspective 123
Constructs of the Theory of Reasoned Action and Theory of Planned Behavior 124
Applications of the Theory of Reasoned Action and the Theory of Planned Behavior 130
Limitations of the Theory of Reasoned Action and Theory of Planned Behavior 132
Application Exercise 134
Skill-Building Activity 134
Summary 136
Important Terms 138
Review Questions 138
Websites to Explore 138
References 140

CHAPTER 6  Theories of Stress and Coping 146

Key Concepts 146
Historical Perspective 147
Constructs of Theories of Stress and Coping 150
Applications of the Theories of Stress and Coping 156
Limitations of the Theories of Stress and Coping 160
Application Exercise 160
Skill-Building Activity 162
Summary 164
Important Terms 165
Review Questions 165
Websites to Explore 166
References 167
Contents

CHAPTER 7 Social Cognitive Theory

Key Concepts 174
Historical Perspective 175
Underpinnings of Social Cognitive Theory 177
Constructs of Social Cognitive Theory 179
Applications of Social Cognitive Theory 184
Limitations of Social Cognitive Theory 187
Application Exercise 189
Skill-Building Activity 189
Summary 192
Important Terms 193
Review Questions 194
Websites to Explore 194
References 195

CHAPTER 8 Social Marketing

Key Concepts 202
Historical Perspective 203
Differences Between Commercial Marketing and Social Marketing 204
Approach and Constructs of Social Marketing 206
Applications of Social Marketing 211
Limitations of Social Marketing 212
Application Exercise 214
Skill-Building Activity 215
Summary 217
Important Terms 219
Review Questions 219
Websites to Explore 220
References 221

CHAPTER 9 Diffusion of Innovations

Key Concepts 228
Historical Perspective 229
Constructs of the Diffusion of Innovations Theory 230
Applications of the Diffusion of Innovations Theory 237
Limitations of the Diffusion of Innovations Theory 238
CHAPTER 10 Freire's Model of Adult Education

Key Concepts 252
Historical Perspective 253
Approach of Freire’s Model 254
Constructs of Freire’s Model 256
Applications of Freire’s Model in Health Education 260
Limitations of Freire’s Model 262
Application Exercise 263
Skill-Building Activity 264
Summary 265
Important Terms 266
Review Questions 267
Websites to Explore 267
References 268

Glossary 273

PREFACE

We have been extremely pleased with the response that the First Edition of Theoretical Foundations of Health Education and Health Promotion received from its readership. This book has been used in both undergraduate courses and introductory graduate-level courses. We hope we will receive the same love, support, and admiration with the launch of this Second Edition.

The field of health education and health promotion has evolved from the early days of focusing on information dissemination to knowledge-based programs to present-day theory-based behavior change interventions. This introductory text for undergraduate students, entry-level graduate students, and practitioners working in the field summarizes common theories from the behavioral and social sciences that are being used in health education and health promotion. Hence this book is required reading for all students in public health and health education.

Theoretical Foundations of Health Education and Health Promotion provides an accessible, uniform approach to understanding the theories commonly used in health education and health promotion. Each theory is described in a consistent and uniform manner and discussed in simple language with an emphasis on practical applications. The book is neither overwhelming nor too short, and is compatible for teaching in a quarter or a semester-long course. The information presented here is in consonance with the core competencies for entry-level practitioners described by the National Commission for Health Education Credentialing (NCHEC) and provides a useful review for those preparing to take the certification examination. The book is also useful for those preparing for the Certified in Public Health (CPH) exam administered by the National Board of Public Health Examiners (NBPHE). Each chapter offers several learning tools to aid readers in understanding and learning to apply theory-based behavior change interventions:

- Key concepts and chapter objectives begin each chapter and help readers focus their attention and retain important information.
- Chapter summaries conclude each chapter and provide an opportunity for readers to prepare for exams and master key concepts effectively by reinforcing important topics and key terms. Key terms and their definitions are also provided in the glossary at the end of the book.
Preface

- Boxed quotations highlight the theorists or important aspects of the theory and provide a direct flavor of the actual theory.
- Each chapter begins with a discussion of the historical genesis and constitutive constructs of the theory. This foundation is followed by a clear delineation of the constructs of the theory, which helps readers understand the process by which the theory is reified and used in health education and health promotion. This process of simplification of constructs helps the health education and health promotion student to apply these constructs in designing programs.
- New to the Second Edition, Application Exercises in each chapter present a case study that urges readers to apply concepts discussed in the chapter and to retrieve additional applications from the literature.
- Each discussion of theory is accompanied by a practical Skill-Building Activity in the context of planning and evaluation along with a set of application questions. This activity will assist readers in mastering the application of the theory to community, school, worksite, or patient care settings.
- Up-to-date examples of applications from current literature are included throughout the text and serve as ideas for designing interventions and resources for initiating literature review.
- Each chapter includes a Websites to Explore section that encourages readers to participate in a specific interactive activity to enhance their learning on the topic.

INSTRUCTOR AIDS

We have prepared a set of PowerPoint slides for each chapter that instructors can use for classroom lectures. Instructors also have access to a series of online TestBank questions for each chapter. Instructor resources and additional resources for students may be accessed at http://health.jbpub.com/foundations/2e.
ACKNOWLEDGMENTS

We want to thank all of the reviewers who read through this text and provided invaluable advice: Carl Fertman, PhD, CHES, University of Pittsburgh; Deborah A. Fortune, North Central Carolina University; Wendelyn Inman, PhD, Tennessee State University; Dr. Jacqueline E. Sharpe, Old Dominion University; and Joshua H. West, PhD, MPH, Brigham Young University. A special appreciation is extended to graduate students at the University of Cincinnati who have used this book in the course HPE 781: Social and Behavioral Change in Public Health and provided excellent suggestions.
