SUMMARY

*Health Sciences Literature Review Made Easy, Fourth Edition* is an essential text for your nursing research course and provides students with a solid foundation and the tools they need to evaluate articles and research effectively. The *Fourth Edition* builds on the digital updates made to the previous edition and highlights the Matrix Method and the skills necessary to critically evaluate articles. The text also covers Method Maps, which teach students how to effectively construct a research study.

The author leads students through the process of how to manage a quality literature review in the context of evidence-based practice. A case study highlighting a typical graduate student is woven throughout the text to illustrate the importance of literature reviews and evidence-based practice.

*Health Sciences Literature Review Made Easy, Fourth Edition* is appropriate for graduate level nursing courses as well as undergraduate Nursing Research courses that require literature reviews.

**Key Features:**

- Data Visualization: A Digital Exploration is an interactive, online appendix
- The Matrix Method teaches the essential skills around literature evaluation
- A real-life scenario case study is woven throughout each chapter to reinforce key concepts
- Completely updated chapter on the guidelines for Methodological Review
- Method Maps are introduced to convey the thought process around designing a research study

**Online Bonus!**

Each text purchase includes access to an online supplement for students via the Navigate Companion Website which features a cutting-edge, interactive appendix. This digital exploration of Data Visualization includes new content, podcasts from the author, and supplemental resources such as TED talks. The *Navigate Companion Website* is comprised entirely of bonus content not found in the book. This is an excellent additional resource for students!

**Navigate Companion Website Features:**

- Bonus Appendix called “Appendix C: Data Visualization—A Digital Exploration is an 11-part appendix that walks students through learning about data visualization using nine author podcasts as well as outside resources, such as TED talks, articles, and blogs
- Objectives exclusive to the appendix for students to complete
