

NEW **2.0** LAB ENVIRONMENT

AVAILABLE FALL 2014

What's **NEW** with the ISSA Series and the Virtual Security Cloud Labs!

You asked... We listened! Our commitment is to deliver innovative, quality courseware to you and your students in an environment that is top-notch. With the new Virtual Security Cloud Labs 2.0, available this Fall, you will find:

- ✔ **Embedded Lab Manuals** — No need for the old printed lab manual. Now labs can be performed entirely online with lab steps conveniently located in the margin.
- ✔ **Enhanced User Experience** — With the 2.0 environment, users will experience a seamless log-on and an improved start-up time
- ✔ **The Latest Software** — The 2.0 environment includes complete updates of all of the Operating Systems, Software, and Virtual Machines
- ✔ **More Virtual Labs** — We have increased the number of Virtual Security Cloud Labs from 65 to 80 across our 8 courses, including 10 new labs to accompany Stewart's *Networking Security, Firewalls and VPNs, Second Edition*
- ✔ **Challenge Questions** — New questions provide additional learning opportunities for motivated students and instructors

Learn more about the exciting new enhancements to the Information Systems Security and Assurance Curriculum and Virtual Security Cloud Labs!

Contact your Account Specialist for more information on the Virtual Security Cloud Labs 2.0 environment!

NEW for SUMMER 2014

As the need for qualified information security professionals continues to grow, so does the **Information Systems Security & Assurance** Series.
