

# NAVIGATE™ SCENARIO

## Immerse Your Students in a Virtual World of Health Care Administration

### A First-of-Its-Kind Immersive Learning, Assignment, and Natural Assessment Tool

Introducing **Navigate Scenario: LearnScapes**. With content aligned to our best-selling textbooks, these LearnScapes are designed to prepare your students for success in the real world of health care management and administration. In these virtual simulations, your students will take on the role of CEO, Marketing Consultant, Quality Improvement Director, Health Policy intern, and many others. Immersed in a photo-realistic world with a full cast of characters, they will be faced with challenging situations and tough decision making.

#### For Institutions/Faculty:

- **Provide an impactful learning experience** that can be easily integrated to your existing curriculum and delivered online, on ground, or hybrid.
- **Get started quickly** with our printable quick start training guides that cover the most important information first so that you can start exploring sooner.
- **Faculty and student support tools** will ensure a seamless learning experience. A training portal containing a variety of resources will provide students and educators with additional guidance.

#### For Students:

- **Access content easily** around the clock, 24x7x365, and around the globe. Students can access sessions on their schedule, practice at their own speed, and reuse as many times as they need.
- **Prepare for real-world challenges** in high demand healthcare field. Practice critical thinking and communication skills and apply classroom knowledge to industry specific situations.
- **Gain the advantage** with this first-of-its-kind learning environment that lets students play the role of decision-maker.
