

Nursing Research: Reading, Using and Creating Evidence, Third Edition

Janet Houser, PhD, RN

ISBN-13: 978-1-2840-4329-7

Product With Access Code - 550 pages - © 2015

Will Publish: 11/1/2013

SEE WHAT'S NEW TO THE THIRD EDITION!

This Guide outlines many of the changes and new content in the *Third Edition*. Use this guide for an easy transition to the Fourth Edition.

This item was created as a transition tool for instructors.
It is not intended for resale, dissemination, or duplication.

CHAPTER OUTLINES

Table of Contents Comparison to transition from the Second to the *Third Edition*

Nursing Research, Second Edition	Nursing Research, Third Edition
Part 1 An Introduction to Research	
Chapter 1 The Importance of Research as Evidence in Nursing	Chapter 1 Research as evidence for nursing practice
Chapter 2 The Research Process and Ways of Knowing	Chapter 2 Ethical, Legal, and Economic Foundations of the Educational Process
Chapter 3 Ethical and Legal Considerations in Research	Chapter 3 Legal and ethical considerations in research and EBP
Part II Planning for Research	
Chapter 4 Finding Problems and Writing Questions	Chapter 4 Finding problems and writing questions
Chapter 5 The Successful Literature Review	Chapter 5 The successful literature review
Chapter 6 Theoretical Frameworks	Chapter 6 Selecting a design
Chapter 7 Selecting an Appropriate Research Design	Chapter 7 Sampling strategy
Part III Research Process	
Chapter 8 The Sampling Strategy	Chapter 8 Measurement and data collection
Chapter 9 Measurement Strategies	Chapter 9 Enhancing validity
Chapter 10 Data Collection Methods	Chapter 10 Descriptive questions and procedures

<p>This item was created as a transition tool for instructors. It is not intended for resale, dissemination, or duplication.</p>
--

Chapter 11 Enhancing the Validity of Research	Chapter 11 Descriptive data analysis
Part IV Research that Describes Populations	
Chapter 12 Descriptive Research Questions and Procedures	Chapter 12 Quantitative questions and procedures
Chapter 13 Summarizing and Reporting Descriptive Data	Chapter 13 Quantitative analysis
Part V Research that Measures Effectiveness	
Chapter 14 Quantitative Research Questions and Procedures	Chapter 14 Qualitative questions and procedures
Chapter 15 Analysis and Reporting of Quantitative Data	Chapter 15 Qualitative analysis
Part VI Research that Describes the Meaning of an Experience	
Chapter 16 Qualitative Research Questions and Procedures	Chapter 16 Translating research into practice
Chapter 17 Analyzing and Reporting Qualitative Results	
Part VII Research Translation	
Chapter 18 Communication Research Findings	
Chapter 19 Translating Research into Practice	

This item was created as a transition tool for instructors.

SUMMARY

Nursing Research: Reading, Using, and Creating Evidence, Third Edition is a reader-friendly text focused on the skills necessary for translating research into evidence. The ***Third Edition*** has been condensed to include crucial information and reviews the most contemporary recommendations of the National Institutes of Nursing Research, the American Association of Colleges of Nursing, and the Magnet Standards for nursing roles at each level of research use and evidence-based care.

Nursing Research, Third Edition defines comparative effectiveness research, a contemporary design which creates evidence for practice that is more natural and is easier to disseminate, while maintaining its methodological rigor.

Discussion around theoretical frameworks is a key element of this text and the research process. The text weaves the concept of theoretical frameworks into research process chapters for ease of comprehension.

Updates to the Third Edition

- Focuses on the skills for transforming research into evidence as related to translational science
- Enhanced chapter on Literature Review covering open access
- Discusses recent recommendations for using qualitative research as evidence for practice
- Provides tools for evaluating qualitative findings for application
- Includes simplified chapters on statistical analysis
- Features a section on the balance of clinical and statistical significance
- Reviews advances in Internet and computer based data entry
- Explores new sampling methods in an effort to reach culturally diverse populations
