SUMMARY

Clinical Research for the Doctor of Nursing Practice, Second Edition offers a streamlined approach to application based clinical research and the development of the capstone project. The text allows for a hands-on approach through its inclusion of sample research studies that encourage analysis and an overall understanding of the nursing research process.

This item was created as a transition tool for instructors.
It is not intended for resale, dissemination, or duplication.

The ***Second Edition*** features new research studies as well as instruction on motivational interviewing, conducting an organizational assessment as well as how to work with a committee to craft a research proposal. This text is appropriate for any DNP course focused on research including the Capstone course.

KEY TEXT BENEFITS AND NEW UPDATES

The ***Second Edition*** has been completely revised with updated references, and loads of new content. This text is a must have for either undergraduate or graduate courses.

- How to critique a research article
- How to form the research committee
- How to use motivational interviewing as a data collection technique
- How to review a manuscript submitted for publication
- How to conduct an organizational assessment
- How to accurately evaluate research
- How to develop the project proposal

This item was created as a transition tool for instructors.
It is not intended for resale, dissemination, or duplication.
