

THIRD EDITION

Ethical Health Informatics

Challenges and Opportunities

Laurinda Beebe Harman, PhD, RHIA, FAHIMA

Associate Professor Emeritus
Department of Health Information Management
College of Public Health
Temple University
Philadelphia, Pennsylvania

Frances H. Cornelius, PhD, MSN, RN-BC, CNE

Professor and Chair
MSN Advanced Practice Role Department & Complementary and Integrative Health Programs
Coordinator of Clinical Nursing Informatics Education
College of Nursing and Health Professions
Drexel University
Philadelphia, Pennsylvania

We dedicate this book to

Our parents and first ethical teachers

Paul William and Gloria Virginia Scott Sugg
Frank and Gabriela Haider

Our caring and compassionate ethical husbands

Gilbert Lee Hoffer
John Lynn Cornelius

Our Families

Dorette Eirene Welk and Charleen Rene Szabo
Gabriele Haider, Ryan A. Cornelius, and Janis E. Cornelius

Our colleagues and students who have informed our professional practice
and challenged us to achieve excellence

Chapter 2	Ethical Decision-Making Guidelines and Tools	51
------------------	---	-----------

Jacqueline J. Glover, PhD	
Learning Objectives	51
Introduction	51
<i>Scenario 2-A: Decision Making for an Adolescent</i>	51
What Is an Ethical Issue?	52
Why Do Ethical Issues Need to Be Addressed?	52
But You Can't Teach Ethics, Can You?	53
The Process of Ethical Decision Making	53
Justification in Ethical Reasoning: How Do You Know What Is Best?	57
Classic Ethical Theories	57
Utilitarianism	58
Deontological Theory	58
Applying Multiple Theories	58
Current Ethical Approaches	59
Analysis of Principles	59
Analysis of Rights	59
Ethics of Care	60
Virtue-Based Ethics	60
The Bioethicist's Toolbox	60
Moral Distress	62
<i>Scenario 2-B: Access by Adolescents to Patient Portals</i>	62
Ethics Resources	63
Conclusion	63
Key Terms	63
Chapter Summary	63
References	64
Blank Ethical Decision-Making Matrix	66

	Ethical Decision-Making Matrices	67
	<i>Scenario 2-A: Decision Making for an Adolescent</i>	67
	<i>Scenario 2-B: Access by Adolescents to Patient Portals</i>	70
Chapter 3	Privacy and Confidentiality	75
	Laurie A. Rinehart-Thompson, JD, RHIA, CHP, FAHIMA	
	Laurinda B. Harman, PhD, RHIA, FAHIMA	
	Learning Objectives	75
	Introduction	75
	<i>Scenario 3-A: Family and Friends: Should I Tell?</i>	75
	<i>Scenario 3-B: Share Information on Facebook?</i>	76
	Protecting Health Information	77
	Privacy and Confidentiality	78
	Release of Information	78
	The HIPAA Privacy Rule	79
	History of Privacy Laws	79
	HIPAA Privacy Rule Framework	79
	Requirements for Patient Authorization	80
	Use and Disclosure	81
	Patient Authorization Required	81
	Patient Authorization Not Required	82

SECTION II	Uses of Information	93
Chapter 4	Data Analytics	95
	Billie Anderson, PhD	
	J. Michael Hardin, PhD	
	Learning Objectives	95
	Introduction	95
	The Role of Data Analytics in Health Care	95
	Medical Data and the Data Collection Process	97
	Structured and Unstructured Data	97
	Current State of Medical Data Collection	99

Paper-Based Medical Records	99
Hybrid Medical Records	100
Electronic Medical Records	101
Ethical Dilemmas Associated with Big Data and Data Analytics	102
<i>Scenario 4-A: Readmission Predictive Model Project, Part 1: Right Skills?</i>	103
<i>Scenario 4-B: Readmission Predictive Model Project, Part 2: Impact of Bad Data</i>	104
Value of Model Assumptions	105
Data Altruism	106
Big Data Analysis Techniques Used to Analyze Medical Data	108
Big Data Analysis	108
Traditional Data Analysis	109
Predictive Analytics	109
Supervised and Unsupervised Analyses	109
Conclusion	112
Key Terms	112
Chapter Summary	112

Chapter 5 **Compliance, Fraud, and Abuse** **119**

Laurie A. Rinehart-Thompson, JD, RHIA, CHP, FAHIMA	
Learning Objectives	119
Introduction	119
<i>Scenario 5-A: Documentation Does Not Justify Billed Procedure</i>	119
Regulations that Guide HIM Professionals	121
False Claims Act	121
Qui Tam Statutes	122
Voluntary Disclosure Protocol	123
Anti-kickback Statute	124
Anti-referral Statutes: Stark I and II	124
“Safe Harbors” and Stark Exceptions	125
Mail and Wire Fraud	125
HIPAA Regulations	125
HIPAA Administrative Simplification Standards	126
Security Standards	126
Privacy Standards	126
Enforcement Programs	127
False Claims Penalties	127
Roles for HIM Professionals	127
Compliance Programs to Prevent Fraudulent Behaviors	128
Dilemmas in Practice	129
<i>Scenario 5-B: Accepting Money for Information</i>	130
Fraudulent Documentation Practices	130
<i>Scenario 5-C: Retrospective Documentation to Avoid Suspension</i>	130
Retrospective Medical Record Analysis	132

<i>Scenario 5-D: Coder Assigns Code Without Physician Documentation</i>	132
Coding Turnaround Time	133
Conclusion	133
Key Terms	133
Chapter Summary	134
References	135
Ethical Decision-Making Matrices	136
<i>Scenario 5-A: Documentation Does Not Justify Billed Procedure</i>	136
<i>Scenario 5-B: Accepting Money for Information</i>	138
<i>Scenario 5-C: Retrospective Documentation to Avoid Suspension</i>	140
<i>Scenario 5-D: Coder Assigns Code Without Physician Documentation</i>	142

Chapter 6 Coding 145

Linda Holtzman, MHA, RHIA, CCS, CCS-P, CPC, COC	
Rosalind Holtzman, RN, BA, BSN	
Learning Objectives	145
Introduction	145
<i>Scenario 6-A: Blood Loss Anemia</i>	145
Coding Systems	146
The Function of Coding	147
Legal Foundation and Framework for Ethical Coding	148
Aortography	148
<i>Scenario 6-B: Thoracic Aortogram</i>	148
Coding and Payment Elements	149
Fraud and Abuse	149
Ethical Foundations and Ethical Standards	150
AHIMA Code of Ethics	151
AHIMA Standards of Ethical Coding	151
Coding and Payment Elements	152
Sources for Coding Direction	154
Mandated Sources	154
Coding Sources	154
Credible Sources	154
Main Ethical Challenges	155
<i>Scenario 6-C: Revise the Analysis?</i>	155
Upcoding	156
Unbundling	157
Evading Medical Necessity Requirements	158
Making a Decision and Making Your Case	159
Conclusion	162
Key Terms	162
Chapter Summary	162
References	163
Appendix 6-A: American Health Information Management Association	
Code of Ethics	164
Preamble	164
Purpose of the American Health Information Management Association	
Code of Ethics	164

The Code of Ethics and How to Interpret the Code of Ethics	165
Principles and Guidelines	165
The Use of the Code	169
Code of Ethics 2011 Ethical Principles	170
Resources	170
Appendix 6-B: American Health Information Management Association	
Standards of Ethical Coding	171
Introduction	171
Standards of Ethical Coding	171
Resources	172
How to Interpret the Standards of Ethical Coding	172
Ethical Decision-Making Matrices	177
<i>Scenario 6-A: Blood Loss Anemia</i>	177
<i>Scenario 6-B: Thoracic Aortogram</i>	179
<i>Scenario 6-C: Revise the Analysis?</i>	181

Chapter 7 **Quality Management** **183**

Patrice L. Spath, MA, RHIT	
Fameka B. Leonard, RN, MSN	
Learning Objectives	183
Introduction	183
<i>Scenario 7-A: Inaccurate Publicly Reported Performance Data</i>	183
Quality Management	183
Milestones that Created QM Ethical Questions	185
Transitions Bring Ethical Challenges	187
<i>Scenario 7-B: Audit Results Indicate Inappropriate Health Care</i>	187
Ethical Issues Facing QM Professionals	187
<i>Scenario 7-C: Reporting Hospital-Acquired Conditions</i>	188
Ethical Standards Affecting QM Activities	189
Quality and Professional Ethics	189
Code of Ethics	190
Organizational Values	191
<i>Scenario 7-D: Disclosure of an Unanticipated Outcome</i>	191
Personal Convictions	192
Moral Courage	193
<i>Scenario 7-E: Failure to Check Physician's Licensure Status</i>	193
Making Ethical Decisions	193
QM Situations Raising Ethical Questions	194
Enabling Ethical Conduct	195
Role of the Profession	195
Role of the Employer	196
Conclusion	196
Key Terms	197
Chapter Summary	197
References	197
Ethical Decision-Making Matrices	200
<i>Scenario 7-A: Inaccurate Performance Data Reported to the Public</i>	200
<i>Scenario 7-B: Audit Results Indicate Inappropriate Health Care</i>	202
<i>Scenario 7-C: Reporting Hospital-Acquired Conditions</i>	204

	<i>Scenario 7-D: Disclosure of an Unanticipated Outcome</i>	206
	<i>Scenario 7-E: Failure to Check Physician's Licensure Status</i>	208
Chapter 8	Research and Decision Support	211
	Susan White, PhD, RHIA, CHDA	
	J. Michael Hardin, PhD	
	Learning Objectives	211
	Introduction	211
	<i>Scenario 8-A: Designing a Survey to Bias the Results</i>	212
	<i>Scenario 8-B: The Impact of Sample Selection Bias</i>	212
	Roles of the RS and DSS	213
	Ethical Responsibilities of the RS and DSS	215
	Ensuring Data Integrity and Confidentiality	215
	Data Acquisition and Integrity	217
	Privacy and Confidentiality	218
	Data from External Sources	219
	Data Reporting	219
	Data Access	220
	Human Subject Research	221
	Internal Review Board	221
	Research Versus Clinical Record	224
	Medical Record Data in Retrospective Studies	225
	Maintaining and Enhancing Professional Competence	226
	Conclusion	226
	Key Terms	226
	Chapter Summary	226
	References	227
	Ethical Decision-Making Matrices	229
	<i>Scenario 8-A: Designing a Survey to Bias the Results</i>	229
	<i>Scenario 8-B: The Impact of Sample Selection Bias</i>	231
Chapter 9	Public Health and Informatics	233
	Babette J. Neuberger, JD, MPH	
	Eric S. Swirsky, JD, MA	
	Learning Objectives	233
	Introduction	233
	<i>Scenario 9-A: Gun Control and Reporting Mental Health Status</i>	233
	Public Health Information: An Overview	236
	The Evolution of Public Health and Government Access to Private Medical Information	237
	State Use of Protected Health Information: Sexually Transmitted Disease Contact Tracing and Partner Notification	242
	Ethical Challenges in Public Health	245
	When the Public's Right to Know Conflicts with the Individual's Right to Privacy	245
	An Antecedent Issue: The Duty to Decide	246
	Making a Reasoned Decision	247
	Autonomy	247

Nonmaleficence	248
Beneficence	249
Justice	250
Utility	251
Globalization and Attendant Ethical Challenges	253
Opportunities and Ethical Challenges of Social Media	255
The HIM Professional's Role and Responsibility as an Advocate	258
A Reciprocal Duty Owed to Society	258
Superior Knowledge	259
An Unambiguous Duty to Protect Patient Privacy	259
Resources for Advocacy	259
<i>Scenario 9-B: Conflicting Personal and Public Duties</i>	260
Making a Reasoned Decision	261
Analyzing the Ethical Conflict	261
Conclusion	262
Key Terms	262
Chapter Summary	262
References	263

<i>Scenario 9-A: Gun Control and Reporting Mental Health Status</i>	266
<i>Scenario 9-B: Conflicting Personal and Public Duties</i>	268

Chapter 10 Longitudinal Coordinated Care 271

Ida Critelli Schick, PhD, LFACHE	
Learning Objectives	271
Introduction	271
The Ever-Changing Healthcare Scene	271
Two Significant Initiatives	271
Healthy People Initiative	271
Healthcare Improvement Initiative	272
Key Stakeholders in Health Care	272
Population Health	273
The Focus on Patient-Centered Care	274
Changes in the Medical Care System	275
Formation of Accountable Care Organizations	275
Critical Cultural Changes in ACOs	275
Health Care in Transition	276
Patient-Centered Medical Homes	276
Longitudinal Care	278
Complex Care Management	282
Exploring the Ethical Dimensions of PCMH and Longitudinal Care	285
Ethical Principles	285
Respect for Autonomy	285
Application of Respect for Autonomy: Enhancing and Expanding	
Informed Consent in PCMH and Longitudinal Care	285
Beneficence (Do Good) and Nonmaleficence (Do No Harm)	286
Justice	287
A Decision-Making Methodology in Ethics	287
Ethical Challenges and Issues	287

Challenges for Boards and Administrators	288
<i>Scenario 10-A: Competing Stakeholder Agendas in a Community ACO</i>	288
Longitudinal Care Coordination	289
<i>Scenario 10-B: Patient Transfer</i>	289
Conclusion	290
Key Terms	290
Chapter Summary	290
References	291
Ethical Decision-Making Matrices	293
<i>Scenario 10-A: Competing Stakeholder Agendas in a Community ACO</i>	293
<i>Scenario 10-B: Patient Transfer</i>	295
Chapter 11 Clinical Care: End-of-Life	297
Deepak Mandi, MD	
Michael A. Silverman, MD, MPH	
James F. Tischler, MD	
Adam G. Golden, MD, MBA	
Learning Objectives	297
Introduction	297
<i>Scenario 11-A: Bad News</i>	297
Autonomy and Beneficence	298
Are Physicians Getting the Right Message Out to Patients?	298
Physician Bias and Equity: A Systems Issue	299
<i>Scenario 11-B: Treatment Choices</i>	299
Information Across a Healthcare Continuum	300
Treatment Goals and Beneficence	300
<i>Scenario 11-C: Advance Care Planning</i>	301
Advance Care Planning: An Opportunity	301
The Meaning of <i>Terminal</i>	302
<i>Scenario 11-D: Palliative Care</i>	302
Managing Pain	303
Palliative Care	303
Emerging Issues	303
Physician-Assisted Suicide	303
Euthanasia	304
Is Withholding or Withdrawing Life-Sustaining Treatment Euthanasia?	304
Conclusion	304
Key Terms	304
Chapter Summary	304
References	305
Ethical Decision-Making Matrices	307
<i>Scenario 11-A: Bad News</i>	307
<i>Scenario 11-B: Treatment Choices</i>	309
<i>Scenario 11-C: Advance Care Planning</i>	311
<i>Scenario 11-D: Palliative Care</i>	313

SECTION III	Electronic Health Information	315
Chapter 12	Electronic Health Records	317
	Mary Alice Hanken, PhD, CHPS, RHIA	
	Gretchen Murphy, MEd, RHIA, FAHIMA	
	Learning Objectives	317
	Introduction	317
	<i>Scenario 12-A: Patient Record Integrity and Access</i>	317
	EHR Systems: Functions and Expected Features	318
	EHR Definitions	319
	EHR Benefits and Functionality	320
	Health Data Uses	321
	EHR Systems in the Twenty-First Century	323
	EHR Technology and Ethical Issues	325
	Patient Privacy	325
	Data Quality	327
	Patient Interest	327
	Organizational Values	328
	Making Ethical Decisions	328
	Ethical Issues in Implementation	328
	Patient Record Integrity and Access	328
	Additional Ethical Issues in Implementation Planning	329
	Clinical Care Process	329
	Data Correction and Editing Process	330
	System Problems	330
	Health Information Access Capabilities	331
	<i>Scenario 12-B: Parent Access to Child's Health Information</i>	331
	Expanded Use of Health Information	331
	Infrastructure Strengths and Weaknesses	332
	New Opportunities for Vendors and Healthcare	
	Organizations	332
	<i>Scenario 12-C: Differences When Linking EHR Systems</i>	333
	User Access	336
	Security Practices	336
	Data Quality/Integrity	337
	Confidentiality Agreements	337
	Notifying Patients About Information Practices	338
	Audit Trails and Email	338
	Conclusion	338
	Key Terms	338
	Chapter Summary	338
	References	339
	Ethical Decision-Making Matrices	341
	<i>Scenario 12-A: Patient Record Integrity and Access</i>	341
	<i>Scenario 12-B: Parent Access to Child's Health Information</i>	343
	<i>Scenario 12-C: Differences When Linking EHR Systems</i>	345

Chapter 13	Information Security	347
	Karen Czirr, MS, RHIA, CHP	
	Emily West, RHIA	
	Learning Objectives	347
	Introduction	347
	<i>Scenario 13-A: A Curious Human Resource Employee</i>	348
	The Healthcare Information Revolution	349
	The Role of the CIO	350
	Access and Information Security	351
	Privacy, Confidentiality, Disclosure, and Need to Know	351
	Privacy-Related Security	352
	Confidentiality, Integrity, Availability	353
	Sanctions	353
	Establishing a Security Baseline	353
	Policies and Procedures	353
	Need to Know and Data Sharing	354
	Access Control	356
	Unique User Identification	356
	<i>Scenario 13-B: Failure to Log Out of the System</i>	358
	Audit Trails	358
	Workstation Use and Security	359
	The Internet, Email, and E-Health	359
	Conducting a Risk Analysis	360
	Identifying Vulnerabilities	360
	<i>Scenario 13-C: Storing Data on a Laptop Computer</i>	360
	Interoperability	361
	Patient Notification and Informed Consent	362
	Conclusion	362
	Key Terms	362
	Chapter Summary	363
	References	363
	Ethical Decision-Making Matrices	365
	<i>Scenario 13-A: A Curious Human Resource Employee</i>	365
	<i>Scenario 13-B: Failure to Log Out of the System</i>	367
	<i>Scenario 13-C: Storing Data on a Laptop Computer</i>	369
Chapter 14	Information Technology and Biomedical Instrumentation	371
	Susan H. Fenton, PhD, RHIA, FAHIMA	
	Frances H. Cornelius, PhD, MSN, RN-BC, CNE	
	Learning Objectives	371
	Introduction	371
	Biomedical Instrumentation and Interoperability	372
	<i>Scenario 14-A: Lack of Interoperability</i>	373
	Medical Device Interoperability Defined	374
	The Need for Interoperability	375
	Codes of Ethics	376

Ethical Issues for Interface Development	377
Interface Development and Biomedical Device Integration	378
Functional Medical Device Interoperability	379
<i>Scenario 14-B: Data Interface Decisions</i>	379
Consultant's Perspective	379
Information Gathering	379
Key Considerations	380
Benefits of Functional Device Interoperability	381
Prioritizing Device Integration	381
A Collaborative Approach to Decision Making	382
<i>Scenario 14-C: Data Interface Quality</i>	383
Conclusion	384
Key Terms	384
Chapter Summary	384
References	385
Ethical Decision-Making Matrices	387
<i>Scenario 14-A: Lack of Interoperability</i>	387
<i>Scenario 14-B: Data Interface Decisions</i>	389
<i>Scenario 14-C: Data Interface Quality</i>	391

Chapter 15 **Information Governance and Management** **393**

Linda L. Kloss, MA, RHIA, FAHIMA	
Learning Objectives	393
Introduction	393
<i>Scenario 15-A: Stewardship Literacy for Community Health Improvement</i>	394
Governance of Health Information	395
Defining Information Governance	395
Defining Data and Other Dimensions of Governance	396
Governance as Ethical Stewardship	397
Healthcare Organizations and Stewardship	399

Foreword

Ethical Health Informatics: Challenges and Opportunities presents an informed discourse on many issues arising from the proliferation of information technology and biotechnology in the delivery and funding of health care in the United States. Ten years have passed since the second publication of this book, and in that timeframe the social and ethical concerns confronting society have expanded. Mapping of the human genome, homeland security, terrorism, bioterrorism, natural disasters, patient safety, medication errors, medical identity theft, hacking of data systems, and accessibility of health care for all have resulted in an increased reliance on information technology to process the massive amounts of data generated by these concerns. However, information technology appears to be both the answer and a potential problem for many ethical challenges concerning the privacy, confidentiality, security, and safety of patient and provider and government electronic information systems.

The societal changes taking place as a result of the above concerns are especially relevant to those individuals who generate healthcare data (doctors, nurses, health practitioners) and those individuals who manage information and technology (health information management and informatics professionals). Today's challenges require vigilance concerning the right and wrong uses of patient information and appropriate and inappropriate access to it from a much broader perspective than in the past. This requires

professionals to assume the ethical responsibility not only to manage, but to protect patient-related data and information resources in whatever form it is contained (paper or electronic), and at whatever site it may be maintained.

These challenges have been eloquently brought to light in the third edition. The book has been expanded to include updated chapters in the areas of professional ethics, uses of information, electronic health records, sensitive information, and consumer and professional informatics. Five new chapters have been added on important topics related to data analytics, information governance, longitudinal health care, information technology and biomedical instrumentation, and future trends and roles healthcare professionals may encounter in the ethical handling of healthcare data and information. An excellent cadre of authors has been brought together to provide an overview and assessment of the ethical issues raised by the increased demands for tertiary and secondary data and information. The authors provide in-depth theoretical and practical discussions on a variety of ethical issues. They address theories and models of ethical practice, along with ethical case scenarios related to selected practice venues. Overall, there are 80 case scenarios to consider along with an eight-step decision-making matrix. The matrix is a wonderful learning tool because it guides the reader in understanding the complexity of problem solving and ethical decision making.

The book is an excellent resource for healthcare professionals in a variety of disciplines, such as clinical medicine, administration, public health, health information management, informatics, and ethics. This book provides standards of conduct and ethical practice, thus introducing the student to the basic ethical principles and values of whatever discipline they represent. For faculty, the book serves as a foundation for debate and discussion that will help weave the ethical fiber of tomorrow's practitioners throughout the educational program. For the practitioner, it offers a confirmation of the standards of conduct and ethical uniformity of practice that supports the practitioner's resolve to address ethical issues in a proactive, effective manner. The practicality of the book makes it attractive to all who are drawn into the professional responsibility of generating, using, or managing health information in an ethical manner.

As the healthcare industry continues to adjust to the requirements of the Affordable Healthcare Act (Obamacare), new delivery modes, cost containment, electronic health record systems, the sharing of information between systems, and the use of data for business and clinical analytics, there will be a need to address the ethical handling of healthcare data and information. I am pleased that *Ethical Health Informatics: Challenges and Opportunities* provides the reader with an awareness and solid foundation for understanding the principles and values so important for the ethical practice of managing healthcare data and information.

Preface

There are two characteristics of this book that make it unique: the content which focuses on the intersection of health informatics and ethics and the use of a decision-making matrix to analyze issues surrounding the appropriate use of health information. The textbook describes the ethical challenges and opportunities that arise from the growing use of data and information in healthcare. Legal and legislative aspects surrounding the ethics of managing data and information are interwoven throughout the book which serves as a resource for teachers, students and practitioners. This textbook is written to reflect a commitment to interdisciplinary collaboration because many of the ethical issues discussed are not limited to just one healthcare discipline. Overall, the textbook is designed to assist health informatics and information management professionals as well as physicians, nurses, social workers, public health professionals, healthcare administrators, health care professionals, such as, physical, occupational and respiratory therapists, and other related disciplines. This textbook will assist professionals who establish standards for ethical competency and those who want to improve their ethical decision-making skills.

The preface will answer the following questions.

- Who are the authors?
- How are the chapters organized?
- What students will benefit from reading this book?

- What is the decision-making matrix and why is it important?
- How can teachers use this book?
- What is the unique value of this book?

Who are the authors?

The authors include faculty, deans, healthcare professionals from universities and governmental agencies and consultants with degrees and credentials across the continuum of healthcare and health informatics. Each author has identified ethical issues reflective of their experience with the topic along with one or more scenarios to illustrate the issue under discussion.

How are the chapters organized?

This book is divided into six sections: Professional Ethics; Uses of Information; Electronic Health Information; Management of Sensitive Health Information; Consumer and Professional Informatics; and Looking to the Future. Chapters from the 2nd edition were updated and five new chapters were written for this edition, as noted below.

I. Professional Ethics

1. Professional Values and the Code of Ethics
2. Ethical Decision-Making Guidelines and Tools
3. Privacy and Confidentiality

II. Uses of Information4. Data Analytics (*NEW*)

Examines the challenges presented by the vast amount of data available, based on advances in technology. Data analysts must consciously attend to the ethical considerations associated with the management of big data.

5. Compliance, Fraud, and Abuse

6. Coding

7. Quality Management

8. Research and Decision Support

9. Public Health and Informatics

10. Longitudinal Coordinated Care (*NEW*)

Describes the implications of a significant change in health care as the patient becomes a member of the care team across the continuum of the healthcare system. Patient-centered medical homes, longitudinal care and complex care management are explored.

11. Clinical Care: End of Life.

III. Electronic Health Information

12. Electronic Health Records

13. Information Security

14. Information Technology and Biomedical Instrumentation (*NEW*)

Describes the burgeoning growth of information technology and the increasing adoption of biomedical instrumentation.

15. Information Governance and Management (*NEW*)

Clarifies how effective stewardship (responsible handling of information) and governance (ground rules for execution of the information) advances ethical information management.

16. Integrated Delivery Systems

17. Digital Health: Health Information Technology and Information Exchange

IV. Sensitive Information

18. Genetic Information

19. Adoption Information

20. Substance Abuse, Behavioral Health and Sexual Information

V. Consumer and Professional Informatics

21. Digital Health Technologies for Consumers, Patients and Caregivers

22. Management and Leadership

23. Entrepreneurship

24. Vendor Management

25. Advocacy

VI. Looking to the Future26. Future Challenges and Opportunities (*NEW*)

Focuses on potential future professional roles and emerging trends, driven by the explosion of information technology in the healthcare and health information systems and examines how we can educate ourselves and future generations to be prepared to meet these challenges and respond to the opportunities.

What students will benefit from reading this book?

Students enrolled in associate, baccalaureate, masters and doctoral programs in many healthcare related disciplines, including health informatics, health information management, medicine, nursing, healthcare professions, public health, healthcare administration, business and information technology.

What is the decision-making matrix and why is it important?

Ethical issues do not allow the luxury of the right answer based exclusively on laws, standards, or rules. To facilitate ethical decision-making, a matrix has been developed to help readers evaluate and resolve problems based on an understanding of values, professional obligations and multidisciplinary perspectives. The matrix facilitates a more expansive view of a problem and the options for making an ethical decision.

Jacqueline Glover's chapter, *Ethical Decision-Making Guidelines and Tools*, includes an ethical

SCENARIO What is the problem to be solved?		
Steps	Information	
1. What is the question?		
2. What is my “gut” reaction?	What is your first reaction to this case on an emotional level? What assumptions are you making? What biases do you have?	
3. What are the facts?	KNOWN	TO BE GATHERED
4. What are the values? Examine the shared and competing values, obligations, and interests of the many stakeholders in order to fully understand the complexity of the ethical problem(s). STAKEHOLDERS Patient, family, HIM professional(s), healthcare professional(s), administrators, society, and others appropriate to the issue.	Patient: Family: HIM Professional(s): Healthcare professional(s): Administrators: Society: Others, as appropriate:	
5. What are my options?		
6. What should I do?		
7. What justifies my choice?	JUSTIFIED	NOT JUSTIFIED
8. How can I prevent this problem?		

decision-making process, which is presented in the matrix. The textbook includes 80 scenarios which have been analyzed using this matrix.

The ethical decision-making matrix is a tool to help you organize complex ethical problems; however, there is no simple fill-in-the-box approach to ethical decision making. The objective is to follow each step of the process and not move from the question directly to what should be done or how to prevent it next time. If you skip steps, you will not fully understand all of the values and options for action. Also, the matrix provided for each scenario is not the only way to examine the problem. You can make an equally compelling ethical argument for a different

decision—just be sure to follow all the steps of the matrix.

How can teachers use this book?

Ethical decision-making cannot be based on the perspective of one individual. The content in the chapters and the process for analyzing the scenarios, using the matrix, requires team discussions. This textbook can be utilized across-the-curriculum, in conjunction with all of the courses in the professional program. For example, when teaching quality management, faculty can have students read the information on quality management from books, periodicals,

websites and other resources and have the students read the chapter on quality management in this book. Students can be taught the professional content and then discuss the ethical implications of the decisions that must be made. Ethics can be interwoven into all courses so that it can become a standard of practice. This approach can be used for many courses to reinforce and integrate ethical considerations in content areas such as data analytics, clinical decision-making, electronic health record systems (EHRs), information security and management and leadership, to name a few of the courses in professional academic programs. Ethical scenarios can be coordinated with other case studies and learning activities to help students understand how ethics is interwoven in all areas of practice and they can build competencies in the process of exploring the ethical dimensions of professional practice. This textbook can be used in professional courses as noted above and/or in a discipline-specific or multidisciplinary ethics course.

Small group discussions: Most ethics classes combine lecture/didactic with small group discussions. Ethical decisions are analyzed and discussed, using ethical tools and critical thinking. If there are students from multiple academic programs, mix the students up into various groups so that multiple perspectives (personal and professional) can be heard. Understanding the diversity of obligations, values and obligations are essential in the ethical decision-making process. If it is a multidisciplinary course, faculty members from several disciplines can lead the small group discussions. Faculty may also want to reach out to alumni and other practitioners in the area to lead these small group discussions.

Small group or homework assignments: Have the students create the decision-making matrix making equally compelling counterarguments or a decision that is different than what is

presented in the chapter. For example, if the matrix indicates that information should not be shared on Facebook, the students can decide to make a different decision—as long as they use the 8-step matrix to evaluate the problem and decide what to do.

What is the unique value of this book?

All who work within healthcare and information systems must utilize and combine their technical, professional, and ethical expertise. The management of health information increasingly requires decisions that cannot be made only by applying rules, regulations, accreditation standards or legal mandates. Everyone working in roles that support healthcare and health information will need to make ethical decisions. Students and professionals should consistently expand ethical decision-making skills. Understanding the language and tools of ethics, the values embedded in the various professions and applying knowledge in support of ethical decisions is a rewarding endeavor. If someone learns the ethical language and principles and how to use the decision-making matrix, the identification and defense of multiple perspectives and options for ethical decision-making is possible.

The chapters in this book should generate many energized discussions. Ethical decision-making requires courage. Read the chapters, discuss the content in groups and celebrate the joy and power of ethical decision-making.

Acknowledgments

I want to especially thank Gilbert Lee Hoffer, my precious husband. We share the values of gratitude for the gifts of life, the importance of joy and celebration with family and friends, and most important, laughter and love.

Two courageous, compassionate, and intelligent teachers guided my learning about health information and ethics. Louise Huttzell taught me to be passionate about medical records, to always remember the sacredness of the information and to be competent when analyzing, presenting, or releasing health information. Jackie Glover taught me the importance of ethics in my personal and professional life. She is my friend and mentor.

I had the opportunity to work with excellent authors who had the courage to describe the ethical issues for their area of expertise. I was honored to work with these authors, and I thank them for their scholarly and innovative contributions.

In addition to my parents and sisters, I couldn't sustain life without the support of my brother-in-law, Francis Joseph Welk, and my nephews and their families—Paul Joseph, Courtney, and Ryan; John David, Karen, Sebastian, Sara, and Lilith; Jeffrey Scott, Kim, Brady, and Ethan and Gil's children and their partners,

Aaron and Deborah, Ada, Sophia and Kim. Their love and hugs energize my soul.

Friends and their families celebrate life with me: Sandy and John Bailey; Melanie and Martyn Brodnik; Theresa Duff, Dawn Ferguson; Barbara and Ed Fuller; Merida and Russell Johns; Barbara and Gerald Hrycko; Anita, Lea and Mia Jensen; Gwen Kennedy; Alfred and Elana Michenzi; Lisa, Vince and Elisabeth Morton; Bernard Slosberg and Mary Chor; Jane Wietsma and Scott Gudgeon; Sally Williams; parishioners at St. Paul's; Thanksgiving holiday friends and many relatives in the Sugg, Scott and Hoffer families.

My colleagues and friends Melanie Brodnik, Cathy Flite, Lisa Morton, and Virginia Mullen are always there for guidance. Charlie and Edie Seashore have left this life and are my spiritual mentors. Charlie taught me to "think purple!"

Mike Brown, my publisher, was always available for my questions, and I absolutely trust his advice. He has been my publisher for all three editions of *Ethical Challenges*, and he encouraged me to edit this third edition, even though I was "retired." Nicholas Alakel, Rebekah Linga, and Joyce Ippolito guided the words on the page and the production of the book.

xxxviii **Acknowledgments**

We are all students and teachers. Today's dynamic environment requires that of us all. The very nature of contemporary society and the information explosion necessitates that we continually adjust our understanding of the world around us. I wish to take a moment to acknowledge those teachers, mentors, colleagues and students who have contributed to my ethical growth and development and served as the foundational bricks and mortar to help me construct and reinforce my moral fortitude. Without your influence and support, this book would not have been possible.

For me, this book presents an in-depth exploration of important ethical challenges encountered in healthcare and asks some tough, thought provoking questions. Thought provoking questions can spark us think in new and exciting ways. Dr. Elizebeth Smythe (2004) articulates the value of stimulating focused thinking in the following quote:

The very nature of being human means that we cannot not-think. Every person sitting in the classroom will be thinking about something (what others are wearing, how long till lunch, what happened

yesterday). Thoughts will always run around our minds, infuse our emotions, and provoke our bodies. We seek thoughts and thoughts seek us. There will be excitement, concern, bewilderment and clarity, perhaps all in the same experience. The charge is not to 'make thinking happen' for that is beyond our abilities. The teacher, however, has the chance to capture the focus of the think and invest the thinking time in a quest worthy of thought. Thinking can infuse everything with fresh passion, with bold questions, with radical insights. And it can be as simple as stopping to listen, as simple as asking the right question at the right time (p. 331).

You have instilled in me the courage to ask those difficult questions and encourage others to do the same.

Thank you.
