**Disclaimer**

The content, statements, views, and opinions herein are the sole expression of the respective authors and not that of Jones & Bartlett Learning, LLC. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not constitute or imply its endorsement or recommendation by Jones & Bartlett Learning, LLC and such reference shall not be used for advertising or product endorsement purposes. All trademarks displayed are the trademarks of the parties noted herein. *Nurse Anesthesia Pocket Guide: A Resource for Students and Clinicians, Third Edition* is an independent publication and has not been authorized, sponsored, or otherwise approved by the owners of the trademarks or service marks referenced in this product.

There may be images in this book that feature models; these models do not necessarily endorse, represent, or participate in the activities represented in the images. Any screenshots in this product are for educational and instructive purposes only. Any individuals and scenarios featured in the case studies throughout this product may be real or fictitious, but are used for instructional purposes only.

The authors, editor, and publisher have made every effort to provide accurate information. However, they are not responsible for errors, omissions, or for any outcomes related to the use of the contents of this book and take no responsibility for the use of the products and procedures described. Treatments and side effects described in this book may not be applicable to all people; likewise, some people may require a dose or experience a side effect that is not described herein. Drugs and medical devices are discussed that may have limited availability controlled by the Food and Drug Administration (FDA) for use only in a research study or clinical trial. Research, clinical practice, and government regulations often change the accepted standard in this field. When consideration is being given to use of any drug in the clinical setting, the health care provider or reader is responsible for determining FDA status of the drug, reading the package insert, and reviewing prescribing information for the most up-to-date recommendations on dose, precautions, and contraindications, and determining the appropriate usage for the product. This is especially important in the case of drugs that are new or seldom used.

# Contents

■ Acknowledgments	vi
■ Guest Contributors	vii

## *Acknowledgments*

My endless thanks to the University of Pittsburgh Nurse Anesthesia Program, especially John O'Donnell, Sandy Sell, Laura Palmer, Bettina Dixon, and Richard Henker, for the most outstanding education I could hope for. My thanks, also, to the CRNAs and MDAs at Wake Med Hospital Raleigh and to UNC Chapel Hill for being my colleagues and my teachers.

To my idols Louis Guzzi, Richard M. Pino, Virginia Shaw Scherler, William Sowka, David P. Hartson, and especially Martha LeVeque—your friendship, support, and guidance have meant the world to me!

Also thanks to Kevin Fitzgerald, Mary Lou Tucker Taylor, Andy and Linda Hartman, Cheryl and Pete Larrimer, Mark and Donna Mastandrea, Kelly Wiltse-Nicely, Susan Andrews, Eve Overton, Mary Boutieller, Cindy Percival, Tammy Trulock, Kathy Miller, Carole Worthington, Carla Gregg, Donielle Stone, Pam Jacobson, and Tammy and Eric Cipic—with love.

But most of all, to Keith, Kevin, and Kim—the lights of my life who make it all possible every day.
