CLINICAL RESEARCH FOR THE DOCTOR OF NURSING PRACTICE

THIRD EDITION

Allison J. Terry, PhD, MSN, RN
Assistant Dean of Clinical Practice
Associate Professor of Nursing
Auburn University at Montgomery
Montgomery, Alabama

Preface ........................................... vii

UNIT I Preparing for Your Capstone Project 1

Chapter 1 The Importance of Research in the Doctor of Nursing Practice Degree .......... 3

Introduction to the Doctor of Nursing Practice Degree ........................................... 4

The DNP-Prepared Nurse in Academia ................................................................. 8

The DNP Graduate as an Agent for Quality Improvement ....................................... 9

The DNP Graduate as an Advocate for Health Care Through Use of Healthcare Policy ................................................................. 10

The DNP Graduate as an Advanced Practice Nurse ........................................... 11

The DNP Graduate as a User of Information Systems and Technology ..................... 12

The DNP Graduate with an Aggregate Focus ............................................................. 12

The DNP Graduate’s Clinical Scholarship and Evidence-Based Practice ................. 13

The DNP Graduate’s Participation in Evidence-Based Decision Making ............ 16

The Process of Translating Evidence Into Clinical Practice .................................... 16

Learning Enhancement Tools ................................................................................... 18

Chapter 2 Developing the Researchable Problem .................................. 21

Selection of the Research Problem and Development of the Research Question ................................................................. 21

Appropriate Use of a Research Question ................................................................. 23

Appropriate Use of a Hypothesis ............................................................................. 24

Developing a Testable Hypothesis .......................................................................... 25

Use of a Theoretical or Conceptual Framework ..................................................... 27

Selecting a Theoretical Framework ......................................................................... 29

Learning Enhancement Tools ................................................................................... 30

Chapter 3 Conducting a Literature Review ............................................. 37

Purpose of the Literature Review ............................................................................. 37

Structuring the Literature Review ........................................................................... 38

Critical Appraisal of the Literature .......................................................................... 39

Collecting Data Sources ............................................................................................. 40

Steps to Include in the Critique of a Research Article ........................................ 40

Critical Appraisal of References .............................................................................. 45

Learning Enhancement Tools ................................................................................... 46

Chapter 4 Ethics in Clinical Research ..................................................... 47

Ethical Principles ....................................................................................................... 47

Rights of Participants in a Research Study ............................................................. 49

Confidentiality ........................................................................................................... 50
### Contents

Health Insurance Portability and Accountability Act Compliance ........ 50  
Institutional Review Boards .................. 52  
Learning Enhancement Tools ............... 57  

**UNIT II Choosing a Design for Your Capstone Project** ........ 59  

**Chapter 5 Selecting a Methodology for Your Capstone Project** .... 61  
Secondary Data Analysis ..................... 61  
Systematic Reviews ......................... 62  
Health Policy Development .................. 63  
Gap Analysis ................................. 65  
Development of a Curriculum ............... 67  
Designing a Quality Improvement Project .................. 68  
Comparison of Models of Care Delivery............ 69  
Learning Enhancement Tools ............... 70  

**Chapter 6 Designing a Clinically Based Quantitative Capstone Research Project** ........ 71  
Basic Types of Quantitative Research ........ 72  
Advantages and Limitations of Quantitative Research ................. 72  
Experimental Research Designs .............. 73  
Non-experimental Research Designs .......... 75  
Quasi-Experimental Research Designs ........ 77  
Learning Enhancement Tools ............... 81  

**Chapter 7 Designing a Clinically Based Qualitative Capstone Research Project** ........ 87  
Basic Types of Qualitative Research ........ 87  
Advantages and Limitations of Qualitative Research ................ 89  

**UNIT III Implementing Your Capstone Project** ........ 115  

**Chapter 8 Designing a Clinically Based Mixed Method Capstone Research Project** .... 101  
Introduction to Mixed Method Research .................. 102  
Advantages and Limitations of Mixed Method Research ............... 102  
Deciding to Utilize a Mixed Method Approach .................. 103  
Mixed Research Approaches .................. 103  
Specific Mixed Research Designs ................ 104  
Selecting a Type of Mixed Research Design .................. 108  
Stages of the Mixed Research Process .................. 109  
Learning Enhancement Tools ............... 110  

**Chapter 9 Sampling** ........ 117  
Introduction to the Process of Sampling .................. 118  
Quantitative Sampling Designs ............... 118  
Random Selection and Random Assignment .................. 122  
Determining Sample Size .................... 122  
Qualitative Sampling Designs ............... 123  
Qualitative Sampling Strategy ................ 124  
Learning Enhancement Tools ............... 126  

**Chapter 10 Data Collection** ........ 129  
Introduction to the Process of Data Collection .................. 130  
Updates to HIPAA Legislation ............... 130

UNIT IV Examples of Studies and Projects 179

Chapter 14 Reducing 30-Day Hospital Readmission of the Patient With Heart Failure: An Evidence-Based Quality Improvement Project 181

Institute of Medicine Six Aims 183

- Needs Assessment 183
- Quality Improvement 185
- Evidence-Based Model 186
- Review of the Evidence 186
- Phases of the Project 187
- Plan for Evaluation 188
- Identification of Performance Measures 189

- Retrieval of Data 190
- Data Analysis 190
- Plan 196
- Do 197
- Study 197
- Act 197
- Levels of Evidence 208
- Grades of Recommendations 209
- Table of Contents 210
- Section One: What Is Heart Failure? 210
- Section Two: Warning Signs and Symptoms and Whom to Contact 212
- Section Three: Weighing Every Day 212
- Section Four: Your Medication 213
- Section Five: Diet 214
- Section Six: Activity 214
- Section Seven: Questions for My Healthcare Provider 215
Today's modern society is changing so rapidly that in many ways it seems to be more virtual than reality, thanks in part to ever-expanding technology that allows us to make the community grow from our backyard into the neighboring country. When these aspects are combined with a patient's ever-changing healthcare need, the result can be bewildering for nurses trying to prepare themselves as leaders in the healthcare arena. That preparation can come from a combination of evidence-based practice and the education preparation found in the doctor of nursing practice (DNP) degree. The DNP-prepared nurse is proving to be valuable in a variety of settings, and in reflection of that, the third edition of the text includes a discussion of the role of the DNP-educated nurse in academia.

For the nurse who has been dedicated to a bedside practice and now is conscientious enough to seek the additional validation derived from the DNP degree, the capstone project can be a source of anxiety. It is the hope that this text will serve as a guidebook for the nurse who is navigating through that process as well as a compass that will assist in avoiding obstacles, developing realistic timelines, and setting achievable goals.

The third edition of the book continues the focus on the capstone project. To expedite the process of developing the project, new information is included describing the selection of a theoretical framework. To expedite the implementation of the project, information is provided on recent updates to the Health Insurance Portability and Accountability Act (HIPAA).

It is the hope of the author that this text will assist the DNP student who is intending to serve as a catalyst for change in the healthcare community. May it serve as a compass for the nurse who is uncertain as to which fork in the road to the capstone project will be most helpful.
