Contents

1 Complex Numbers **1**

1.1 The Origin of Complex Numbers 1
1.2 The Algebra of Complex Numbers 11
1.3 The Geometry of Complex Numbers 21
1.4 The Geometry of Complex Numbers, Continued 27
1.5 The Algebra of Complex Numbers, Revisited 36
1.6 The Topology of Complex Numbers 43

2 Complex Functions **53**

2.1 Functions and Linear Mappings 53
2.2 The Mappings $w = z^n$ and $w = z^{\frac{1}{n}}$ 67
2.3 Limits and Continuity 75
2.4 Branches of Functions 84
2.4.1 The Riemann Surface for $\boldsymbol{w = z^{\frac{1}{2}}}$ 87
2.5 The Reciprocal Transformation $w = \frac{1}{z}$ 90

3 Analytic and Harmonic Functions **97**

3.1 Differentiable and Analytic Functions 97
3.2 The Cauchy–Riemann Equations 104
3.3 Harmonic Functions 116

4 Sequences, Julia and Mandelbrot Sets, and Power Series **127**

4.1 Sequences and Series 127
4.2 Julia and Mandelbrot Sets 136
4.3 Geometric Series and Convergence Theorems 145
4.4 Power Series Functions 151

5 Elementary Functions **159**

5.1 The Complex Exponential Function 159
5.2 The Complex Logarithm 167
5.3 Complex Exponents 174
5.4 Trigonometric and Hyperbolic Functions 180
5.5 Inverse Trigonometric and Hyperbolic Functions 192

6 Complex Integration **199**
6.1 Complex Integrals 199
6.2 Contours and Contour Integrals 204
6.3 The Cauchy–Goursat Theorem 220
6.4 The Fundamental Theorems of Integration 235
6.5 Integral Representations for Analytic Functions 241
6.6 The Theorems of Morera and Liouville, and Extensions 247

7 Taylor and Laurent Series **255**
7.1 Uniform Convergence 255
7.2 Taylor Series Representations 262
7.3 Laurent Series Representations 273
7.4 Singularities, Zeros, and Poles 282
7.5 Applications of Taylor and Laurent Series 291

8 Residue Theory **297**
8.1 The Residue Theorem 297
8.2 Trigonometric Integrals 307
8.3 Improper Integrals of Rational Functions 312
8.4 Improper Integrals Involving Trigonometric Functions 317
8.5 Indented Contour Integrals 322
8.6 Integrands with Branch Points 329
8.7 The Argument Principle and Rouché's Theorem 334

9 z-Transforms and Applications **345**
9.1 The z-transform 345
9.1.1 Admissible Form of a z-transform 347
9.1.2 Properties of the z-transform 349
9.1.3 Table of z-transforms 350
9.1.4 Properties of the z-transform 353
9.1.5 Application to Signal Processing 353
9.1.6 First-Order Difference Equations 356
9.1.7 Methods for Solving First-Order Difference Equations . 356
9.2 Difference Equations 367
9.2.1 Remark About Stability 368
9.2.2 Higher-Order Difference Equations 369
9.2.3 Difference Equations with Initial Conditions 370
9.2.4 Convolution for Solving a Nonhomogeneous Equation . 377
9.3 Digital Signal Filters 383
9.3.1 Introduction to Filtering 383
9.3.2 The Basic Filters 384

© Jones & Bartlett Learning, LLC. NOT FOR SALE OR DISTRIBUTION.

9.3.3 The General Form . . . 388
9.3.4 Design of Filters . . . 392

10 Conformal Mapping 405
10.1 Basic Properties of Conformal Mappings . . . 405
10.2 Bilinear Transformations . . . 412
10.2.1 Lines of Flux . . . 418
10.3 Mappings Involving Elementary Functions . . . 420
10.3.1 The Mapping $w = \left(z^2 - 1\right)^{\frac{1}{2}}$ . . . 424
10.3.2 The Riemann Surface for $w = \left(z^2 - 1\right)^{\frac{1}{2}}$ . . . 426
10.4 Mapping by Trigonometric Functions . . . 428
10.4.1 The Complex Arcsine Function . . . 430

11 Applications of Harmonic Functions 435
11.1 Preliminaries . . . 435
11.2 Invariance of Laplace's Equation and the Dirichlet Problem . . . 437
11.3 Poisson's Integral Formula for the Upper Half-Plane . . . 449
11.4 Two-Dimensional Mathematical Models . . . 454
11.5 Steady State Temperatures . . . 456
11.5.1 An Insulated Segment on the Boundary . . . 460
11.6 Two-Dimensional Electrostatics . . . 469
11.7 Two-Dimensional Fluid Flow . . . 476
11.8 The Joukowski Airfoil . . . 487
11.8.1 Flow with Circulation . . . 491
11.9 The Schwarz–Christoffel Transformation . . . 496
11.10 Image of a Fluid Flow . . . 506
11.11 Sources and Sinks . . . 509
11.11.1 Source: A Charged Line . . . 510

12 Fourier Series and the Laplace Transform 523
12.1 Fourier Series . . . 523
12.1.1 Proof of Euler's Formulas . . . 528
12.2 The Dirichlet Problem for the Unit Disk . . . 533
12.3 Vibrations in Mechanical Systems . . . 539
12.3.1 Damped System . . . 541
12.3.2 Forced Vibrations . . . 542
12.4 The Fourier Transform . . . 547
12.5 The Laplace Transform . . . 552
12.5.1 From the Fourier Transform to the Laplace Transform . . . 552
12.5.2 Properties of the Laplace Transform . . . 554
12.6 Laplace Transforms of Derivatives and Integrals . . . 560
12.7 Shifting Theorems and the Step Function . . . 564
12.8 Multiplication and Division by t . . . 570
