Preface xi

<b>Chapter 1</b>	<b>Introduction to Botany and Microscopy</b>	<b>1</b>
	Laboratory Activities	1
	Goals	1
	Introduction	1
	Activities	2
	Activity 1.1: Compound Light Microscope	2
	Activity 1.2: Storing the Microscope	6
	Activity 1.3: Stereomicroscope	6
	Study Guide	7
	Conclusions	8

<b>Chapter 2</b>	<b>Plant Cells</b>	<b>11</b>
	Laboratory Activities	11
	Goals	11
	Introduction	11
	Activities	12
	Activity 2.1: Cork Cells	12
	Activity 2.2: Onion ( <i>Allium</i> ) Epidermis	12
	Activity 2.3: <i>Elodea</i> Leaf	14
	Activity 2.4: Potato Tuber Cells	15
	Activity 2.5: Tomato Pulp Cells	17
	Activity 2.6: Tomato Epidermis	17
	Activity 2.7: <i>Zebrina</i> Stem Tissue	18
	Activity 2.8: Osmosis and Plant Cells	20
	Study Guide	21
	Conclusions	21

<b>Chapter 3</b>	<b>Cell Division</b>	<b>23</b>
	Laboratory Activities	23
	Goals	23
	Introduction	23
	Activities	25
	Activity 3.1: Mock Mitosis	25
	Activity 3.2: Mitosis in Onion Cells	26
	Activity 3.3: Mock Meiosis	27

## Contents

	Study Guide	28
	Conclusions	28
<b>Chapter 4</b>	<b>Plant Tissues and Herbaceous Stems</b>	<b>31</b>
	Laboratory Activities	31
	Goals	31
	Introduction	31
	Activities	32
	Activity 4.1: Fundamental Tissues	32
	Activity 4.2: Surface Tissues	34
	Activity 4.3: Herbaceous Stems	36
	Activity 4.4: Longitudinal Growth of the Herbaceous Stem	41
	Study Guide	44
	Conclusions	44
<b>Chapter 5</b>	<b>Leaves</b>	<b>47</b>
	Laboratory Activities	47
	Goals	47
	Introduction	47
	Activities	48
	Activity 5.1: External Features of a Monocot Leaf	48
	Activity 5.2: External Features of Eudicot Leaves	48
	Activity 5.3: Internal Features of a Monocot Leaf	51
	Activity 5.4: Internal Features of Eudicot Leaves	53
	Activity 5.5: Leaves Adapted to Extreme Environments	55
	Activity 5.6: Specialized Leaves	57
	Activity 5.7: Leaves of Carnivorous Plants	58
	Study Guide	59
	Conclusions	60
<b>Chapter 6</b>	<b>Roots</b>	<b>63</b>
	Laboratory Activities	63
	Goals	63
	Introduction	63
	Activities	64
	Activity 6.1: External Structure of Roots	64
	Activity 6.2: Regions of Growth in a Root	65
	Activity 6.3: Internal Structure of Monocot Roots	66
	Activity 6.4: Internal Structure of Eudicot Roots	69
	Activity 6.5: Growth of Lateral Roots	71
	Activity 6.6: Root Symbioses	72
	Study Guide	74
	Conclusions	74
<b>Chapter 7</b>	<b>Secondary Meristems and Woody Growth</b>	<b>77</b>
	Laboratory Activities	77
	Goals	77
	Introduction	77
	Activities	78
	Activity 7.1: External Growth of Woody Stems	78
	Activity 7.2: Leaf Abscission	79
	Activity 7.3: Internal Structure of Woody Stems	81
	Activity 7.4: Internal Structure of Woody Roots	83
	Study Guide	84
	Conclusions	84

<b>Chapter 8</b>	<b>Photosynthesis</b>	<b>87</b>
	Laboratory Activities	87
	Goals	87
	Introduction	87
	Activities	89
	Activity 8.1: Pigment Chromatography	89
	Activity 8.2: Measuring Photosynthesis	91
	Study Guide	93
	Conclusions	93
<b>Chapter 9</b>	<b>Cellular Respiration and Fermentation</b>	<b>95</b>
	Laboratory Activities	95
	Goals	95
	Introduction	95
	Activities	97
	Activity 9.1: Bacterial Fermentation in the Production of Food	97
	Activity 9.2: Bacterial Fermentation of Sugars	99
	Activity 9.3: Yeasts and Alcoholic Fermentation	100
	Activity 9.4: Cellular Respiration	102
	Study Guide	103
	Conclusions	104
<b>Chapter 10</b>	<b>Water Pollution</b>	<b>107</b>
	Laboratory Activities	107
	Goals	107
	Introduction	107
	Activities	108
	Activity 10.1: Effects of Water Pollution on Algae	108
	Activity 10.2: Effects of Water Pollution on Microbial Community	
	Structure	110
	Study Guide	112
	Conclusions	112
<b>Chapter 11</b>	<b>Case Studies in Mineral Nutrition</b>	<b>115</b>
	Laboratory Activities	115
	Goals	115
	Introduction	115
	Activities	117
	Activity 11.1: Case Study 1	117
	Activity 11.2: Case Study 2	117
	Activity 11.3: Case Study 3	118
	Activity 11.4: Case Study 4	119
	Activity 11.5: Case Study 5	119
	Study Guide	121
	Conclusions	121
<b>Chapter 12</b>	<b>Tissue Culture</b>	<b>123</b>
	Laboratory Activity	123
	Goals	123
	Introduction	123
	Activity	124
	Activity 12.1: Growing Plant Cells in Tissue Culture	124
	Study Guide	126
	Conclusions	127

## Contents

<b>Chapter 13</b>	<b>Genetics, Inheritance, and Natural Selection</b>	<b>129</b>
	Laboratory Activities	129
	Goals	129
	Introduction	129
	Activities	131
	Activity 13.1: Predicting the Outcomes of Crosses	131
	Activity 13.2: Population Genetics	133
	Study Guide	136
	Conclusions	136
<b>Chapter 14</b>	<b>Classification and Systematics</b>	<b>139</b>
	Laboratory Activities	139
	Goals	139
	Introduction	139
	Activities	140
	Activity 14.1: Artificial Classification	140
	Activity 14.2: Natural Classification	142
	Study Guide	144
	Conclusions	144
<b>Chapter 15</b>	<b>Algae</b>	<b>147</b>
	Laboratory Activities	147
	Goals	147
	Introduction	147
	Activities	148
	Activity 15.1: Division Chlorophyta—The Green Algae	148
	Activity 15.2: Division Rhodophyta—The Red Algae	153
	Activity 15.3: Division Phaeophyta—The Brown Algae	154
	Activity 15.4: Division Chrysophyta—Diatoms and Their Relatives	156
	Activity 15.5: Division Pyrrophyta—The Dinoflagellates	157
	Activity 15.6: Division Euglenophyta—The Euglenoids	158
	Activity 15.7: Division Cyanobacteria—The Blue-Green Algae	159
	Study Guide	161
	Conclusions	161
<b>Chapter 16</b>	<b>Nonvascular Plants</b>	<b>163</b>
	Laboratory Activities	163
	Goals	163
	Introduction	163
	Activities	165
	Activity 16.1: Moss Gametophores	165
	Activity 16.2: Moss Sporophytes	167
	Activity 16.3: The Complete Moss Plant	168
	Activity 16.4: Liverwort Gametophytes	169
	Activity 16.5: Liverwort Sporophytes	172
	Activity 16.6: Hornworts	173
	Study Guide	175
	Conclusions	175
<b>Chapter 17</b>	<b>Seedless Vascular Plants</b>	<b>179</b>
	Laboratory Activities	179
	Goals	179
	Introduction	179

Activities	180
Activity 17.1: Division Lycophyta	180
Activity 17.2: Division Arthrophyta	183
Activity 17.3: Division Pteridophyta	186
Activity 17.4: Whisk Ferns	190
Study Guide	192
Conclusions	192

## **Chapter 18 Gymnosperms 195**

Laboratory Activities	195
Goals	195
Introduction	195
Activities	196
Activity 18.1: Pine Roots	196
Activity 18.2: Pine Stems	197
Activity 18.3: Pine Leaves	198
Activity 18.4: Pine Reproduction	200
Study Guide	205
Conclusions	205

## **Chapter 19 Angiosperms I: Flowers 207**

Laboratory Activities	207
Goals	207
Introduction	207
Activities	209
Activity 19.1: Tulip ( <i>Tulipa</i> sp.) or Gladiolus ( <i>Gladiolus</i> sp.)	209
Activity 19.2: Lily ( <i>Lilium</i> sp.)	211
Activity 19.3: Geranium ( <i>Pelargonium</i> )	213
Activity 19.4: Rose ( <i>Rosa</i> sp.)	215
Activity 19.5: Petunia ( <i>Petunia</i> sp.)	217
Activity 19.6: Snapdragon ( <i>Antirrhinum majus</i> )	219
Activity 19.7: Daisy or Chrysanthemum ( <i>Chrysanthemum</i> sp.)	221
Activity 19.8: Ovule Development	224
Activity 19.9: Pollen Development	224
Study Guide	225
Conclusions	226

## **Chapter 20 Angiosperms II: Fruits 229**

Laboratory Activities	229
Goals	229
Introduction	229
Activities	230
Activity 20.1: Seeds	230
Activity 20.2: Fleshy Fruits	231
Activity 20.3: Dry Dehiscent Fruits	236
Activity 20.4: Dry Indehiscent Fruits	237
Study Guide	238
Conclusions	239

## **Chapter 21 Fungi 241**

Laboratory Activities	241
Goals	241
Introduction	241

## Contents

Activities	242
Activity 21.1: Slime Molds	242
Activity 21.2: Zygomycetes	243
Activity 21.3: Ascomycetes	245
Activity 21.4: Basidiomycetes	247
Activity 21.5: Imperfect Fungi	249
Activity 21.6: Lichens	250
Activity 21.7: Mycorrhizae	251
Activity 21.8: Rusts and Smuts	251
Study Guide	254
Conclusions	254
 <b>Chapter 22 Prokaryotes</b>	<b>257</b>
Laboratory Activities	257
Goals	257
Introduction	257
Activities	258
Activity 22.1: Culturing Bacteria	258
Activity 22.2: Staining Bacteria	260
Activity 22.3: Pour Plate Method of Bacterial Enumeration	262
Study Guide	263
Conclusions	263
 Index	265
